- Briefly introduce the purpose of the meeting

- What needs to be discussed (4 minutes):

- Everyone has created an AI research document for the week and they are going to present them.
- Andreas has created a form that can be handed out to friends and students so we can gather data so he will go through that
- Martin has created a document which has everyone's contributions and summarises everything.

- What was discussed and decided (60 minutes)

- All the points above were discussed

- Deliverables (15 minutes):

- Create a form to send to geert and to friends to start gathering a preliminary data source
 - Mati creates a google sheets doc and adds everyone so the table is populated
 - Mati writes and sends an email to James about a potential meeting - enacting his guidance.
- Generate more ideas/use cases
- Andreas - carries on with the web app development and sends the form to Martin.
- Jacob will start making calculators - Daniel will also help with that
- Finding potential data sets to support this use case - carbon emissions produced when traveling to work.
