Expression of Interest: Eviden's Data-Driven Sustainability Project

Dear Eviden Team,

We are writing to express our interest in partnering with you for your ambitious data-driven sustainability project. Our team is deeply aligned with Eviden's core values and ambitions.

We are enthusiastic about contributing our technical proficiency, sustainability focus, data security expertise, innovation, and customer-centric approach to support Eviden's mission of building a sustainable digital future for businesses and communities.

Our Alignment with Eviden's Vision:

We completely resonate with Eviden's vision of accelerating digital transformation at scale. Our team members are proficient in various technologies, including HTML, CSS, JavaScript, Java, Python, C, PHP and SQL. We have a deep foundation in computer

science, software development, and technology integration, through our experiences whilst at University. Our experience includes web development which ranges from coding interactive web pages to ensuring responsive design and thorough testing to meet client needs. Our proficiency in software development methodologies like Agile and Scrum, alongside our knowledge of version control systems such as Git, ensures efficient and collaborative development processes.

Sustainability Focus:

Our team is very committed to sustainability practices. Our experiences in previous group projects have equipped us to be conscious and proactive in sustainable efforts. From sustainable sourcing of raw materials to waste reduction and raising awareness about resource efficiency, we have a strong focus on environmental responsibility. We believe in the power of technology to create a positive impact which aligns with Eviden's eco-conscious approach.

Data Security and Innovation:

Data security is important in modern society, and our team members possess an interest in cybersecurity. We have actively contributed to various web-based projects, demonstrating an alert and defensive mindset regarding user confidentiality. Our innovative approach involves developing user interfaces such as chat-bots, ensuring user- friendly interactions through easy-to-use designs and universally recognised icons. Our exposure to an array of projects has honed our skills in adapting to diverse challenges, making us well-equipped to handle the complexities of Eviden's Data-Driven Sustainability initiative.

Customer-Centric Approach:

Our team members have extensive experience in customer service roles, ensuring an approach that is tailored toward the clients needs and requirements. We believe in co- innovating and co-investing in transformative projects, aligning perfectly with Eviden's commitment to delivering value to customers.

Our Proposed Approach to Eviden's Data-Driven Sustainability Project:

- **Use Case Selection:** We propose selecting a use case that demonstrates significant environmental sustainability impact, such as optimising data centre energy usage using AI algorithms to reduce carbon emissions.
- **Platform Selection and User Interfaces:** We will carefully choose a platform (on-prem or cloud) based on accessibility, cost, and carbon footprint considerations. Intuitive dashboards will be developed to ensure user-friendly interactions.
- **AI Integration:** If applicable, we will integrate AI technologies for data analysis, pattern recognition, and predictive modelling, enhancing sustainability efforts.
- **Security and Access Control:** We will implement a robust authentication and authorisation system, ensuring data encryption, secure APIs, and regular security audits to safeguard sensitive information.

• **Stakeholder Engagement and Project Planning:** Stakeholders will be actively involved throughout the project, and a detailed project plan, justified based on project complexity and team preferences, will be developed using tools like Gantt Charts.

• **Monitoring, Evaluation, and Documentation:** We will continuously collect relevant data to assess the solution's impact on sustainability metrics. Regular evaluation against set objectives, along with comprehensive documentation, will ensure knowledge retention and project success.

Why Choose Us?

Our team's technical expertise, sustainability focus, data security acumen, innovative mindset, and customer-centric approach uniquely position us to collaborate effectively with Eviden. We are passionate about contributing to Eviden's mission of driving digital transformation, sustainability, and innovation. We look forward to discussing our collaboration in more detail and demonstrate how our team can add significant value to Eviden's Data-Driven Sustainability project. Thank you for considering our Expression of Interest. We are excited about the prospect of working together and contributing to Eviden's vision of a sustainable digital future.

Warm regards,
Team 39
