EDUCATION

- University** | Sep 2022 - Sep 2027
MSci Hons Computer Science including International Year
- Predicted 1st
 - Modules Included: Software engineering, Web Development, Fundamentals of AI
 - Member of Computer Science, Hacking and Greek Societies
- Christ's School 6th Form - Richmond, London, UK** | Sep 2020 - Jun 2022
- 4 A-Levels: Modern Greek (A*), Computer Science (B), Economics (B), Psychology (B)
 - Gold Crest Award - Reality of Misconceptions about Bitcoin
- Christ's CofE Secondary School - Richmond, London, UK** | Sep 2015 - Jun 2020
- 11 GCSEs: 1 A*, 5 A and 4 B - including an A in Modern Greek
 - Duke of Edinburgh Bronze Award
- Christ's CofE Secondary School - Richmond, London, UK** | Sep 2018 - Jun 2019

WORK EXPERIENCE

- St George's Greek School - Web Designer - Kingston, London** | Jun 2023 - Sep 2023
- Redesign and updated St George's Greek School's website, which required a comprehensive overhaul.
 - Initiated the design process by creating a prototype website containing the initial design of the main page and several other pages. This offered a visual blueprint for the school committee to review.
 - Maintained effective communication through regular check-ups and meetings with the head teacher, ensuring that the website aligned with the school vision and in both Greek and English.
 - Acted upon valuable customer feedback, incorporating it into the website, leading to timely adjustments and exceeding expectations in the final product.
- 'Team UP' Project - Tutor - Richmond, London** | Sep 2020 - May 2021
- Held a tutoring role as part of the 'Team Up' Program, a charity mentoring program targeted at disadvantaged students from the lower years in English Language.
 - Adapted content to suit individual learning preferences was essential when working with a small group of younger students.
 - Structured lesson planning ensured a comprehensive understanding of the material without overwhelming the students, resulting in improved end-of-year grades.
- St George's Greek School - Data Manager - Kingston, London** | Nov 2020 - Feb 2021
- Handled and organised sensitive data regarding the students of St George's Greek School, sorting them into a new system, making the data easier to access.
 - Successfully digitised many years of student data onto an online system was achieved through effective communication with the Head mistress and the school's Secretary.
 - Identified the key data points, including the date and year a student started, when they left the school, which classes they attended etc, made organising and categorising the data efficient.

EXTRA CURRICULAR

- Christ's School - Game Developer - Richmond, London** | Nov 2021 - May 2022
- Developed a game for the final year project and it was included in the school's computer science event, similar to a sports day, where the students play a variety of retro games, and compete to get the highest scores.
 - Achieved cross-platform compatibility for the game by optimising it to run seamlessly on both macOS and Windows platforms, enabling the game to be played on the school's PCs.
 - Gained valuable experience in the end-to-end development process of the game, encompassing the initial planning stage, designing the sprites and mechanics of the game, development and comprehensive documentation throughout the project.
- St George's Greek School - Teaching Assistant - Kingston, London** | Nov 2018 - Feb 2019
- Volunteered as an teaching assistant in a Year 1 class at St George's Greek School as a part of the Duke of Edinburgh Award.
 - Possessed strong patience, enabling the provision of individualised support to every student.
 - Leveraged strong organisational skills to create a well-structured classroom environment, significantly enhancing the overall educational experience

TECHNICAL EXPERIENCE & PERSONAL INTERESTS

- Learned ANSI C, Haskell, PHP, MySQL, ARM Assembly, the Pandas and NumPy libraries in Python and Java as part of the first year programming modules.
- Possessed a strong foundation in web development, showcasing proficiency in HTML, CSS and JavaScript. Along with this, having a good understanding of database management with expertise in database systems like MySQL, as well as SQL querying.
- Demonstrated proficiency in software development methodologies such as Agile and Scrum, with knowledge in version control systems like Git to ensure efficient and collaborative development processes.
- Proficient knowledge on using the macOS system, G-Suite and VSCode.
- Applied strong knowledge in data structures and algorithms foundational to computer science, with an aptitude for efficiently solving technical challenges.
- Influenced by 'Algorithms to Live By' by Brian Christian, about real-world problem-solving and exploring the 'explore/exploit' trade-off.
- Fluently speaking and writing Greek, as a native language.
- Achieved a Grade 5 in Clarinet and Grade 5 in Music Theory - 1st Clarinet in my sixth form's Jazz Band.
- Enthusiastic Rugby 'Prop', played for Secondary and Sixth Form team at a county level.
- Enjoy attending webinars and online courses by HSBC and Santander in free time, gaining skills in teamwork and effective communication.
